

## GPS Speedometer

ANALOGUE GAUGE

The GPS speedometer provides accurate speed over ground readings and heading information all in one attractive package. Available in various speed ranges to meet your application. The GPS speedo is offered in a number of popular styles to match the colours in your boat.

Our GPS speedo can be connected to an existing NMEA 0183 receiver if you have one already installed or you can purchase separately our custom designed GPS receiver/ antenna.

This product is ideal for all speed applications and is particularly useful for slower speed craft and higher speed craft where traditional speed sensors like pitot tubes and paddlewheels do not perform well. An added advantage is there is nothing in the water to corrode or break.

### Key features:

- > Available in various speed ranges
- > Included LCD heading display to show course over ground
- > Use our GPS antenna (sold separately) or connect to an existing NMEA 0183 device
- > Speed accuracy of +/- 1 degree (once moving) over ground
- > Heading accuracy of +/- 3 degree (once moving)
- > Ideal for slow speed applications (pontoon boats & high speed performance boats)
- > Custom OEM styles and ranges available
- > Dimensions: Bezel diameter: 3.78", Gauge housing diameter: 3.4", Back of bezel to end of longest component: 3", Bezel & lens combined protrusion from dash: .58"
